DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4, line 5, "diving" should be –dividing–.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 4,724,299 to Hammeke in view of JP402258186A in view of JP2891378B2.

Hammeke discloses a powder cladding laser nozzle (Front Page) having supply pipe 46, reservoir chamber 38, and passage gap 94.

JP402258186A shows (Figure 3) a laser nozzle having powder holding feature 56.

JP2891378B2 describes (Abstract and Figures 1 and 2b) a laser welding machine comprising a powder supply nozzle having plural delivery passages 43.

The instant claimed nozzle having plural powder inputs to plural powder metal holding regions, and plural discharge passages would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because fine powder delivery to the nozzle and fine powder delivery to the workpiece are made uniform.

The instant dependent claims describe attachable and detachable features, and describe plural members, and describe adjustable features, assembly descriptions, and shapes which do not impart patentability to the laser nozzle apparatus.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 4,724,299 to Hammeke in view of JP402258186A in view of JP2891378B2 as applied to claim 1 above, and further in view of USPN 5,609,781 to Kaga et al.

Kaga et al show a laser nozzle having adjustable distribution and the use of adjustable dividing portions would have been obvious at the time applicant's invention

was made to a person having ordinary skill in the art because it can provide economic operation.

Response to Arguments

Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
